

OZONE TECHNOLOGY

PURIFY. DISINFECT. OZONE TREATMENT.

Our portfolio of ozone products is designed to improve water quality and provide a level of purification and disinfection in water systems. Our generators can produce from .75 grams to 30 grams of ozone per hour and provide a wide range of dosages from .1-20 mg x L/min.

M SERIES OZONE GENERATORS

The compact, powerful M series ozone products are economical, dependable and easy to install. They can be mounted indoors or outdoors and only require a standard 120V electrical outlet. RainFlo M series ozone generators deliver a wide range of ozone dosages to water systems of any size.

Options:

- MiniGen03 OZ 750 - .75 gm/hr
- MidGen03 OZ 3000 - 3 gm/hr
- MaxGen03 OZ 6000 - 6 gm/hr

PRO SERIES OZONE GENERATORS

Progressive Pump & Treatment ozone generators are for commercial and industrial water treatment applications. ProGen systems are designed to provide long lasting, dependable treatment and manufactured to withstand harsh environments.

Options:

- ProGen OZ 10K - 10 gm/hr
- ProGen+ OZ 20K - 20 gm/hr
- ProGen Max OZ 30K - 30 gm/hr

OZONE RECIRCULATION SYSTEMS

Progressive Pump & Treatment complete ozone recirculation systems are available with recirculation, diffusion, direct injection, timer control, and ORP control.

Options:

- Onboard timer
- Pump size
- PLC controls

The ability of ozone to provide water purification/disinfection will depend on the initial water quality in the system, ozone dosage, and the baffling factor in the body of water.
